Issue 1

April 2009

## Mid-States Answers the Call: Adds Architectural Panels

**M**id-States is proud to announce that it has again expanded its array of products and services to include **Architectural Precast Wall Panels.**

It was only a few years ago that Mid-States delighted customers with a wide variety of wall panel options including insulated, non-insulated, composite, non-composite, brick form liner, brick inlay, in addition to several types of finishes all in accordance with PCI MNL 116 or 117 specs as required. Now customers accustomed to the increased satisfaction of Mid-States high quality structural precast and engineering services can enjoy an even wider variety of finishes and colors. Acid etch, sand blast, water wash, brick inlay, brick form liner, granite clad, limestone clad, if you have a vision you want realized, Mid-States Concrete Industries has the ability to make it happen.

# Mid-States Concrete Industries: PRICE CERTAINTY

**M**ajor Projects require a major commitment. Mid-States has a long history of success partnering with owners, architects, and contractors to foster the shared commitment needed to ensure that large and difficult projects are achieved ahead of schedule and within the budget. In fact **Mid-States' Price Certainty Principle™** allows for our team to take a look at your project during the conceptual and/or schematic design phase and generate a firm price, allowing you to plan with confidence.

When the job moves forward you can rest assured that Mid-States will be there to not only provide the beams, columns, plank, wall panels, risers, balconies, and custom precast pieces required, but also the expertise to make sure the completed structural system is built safely and efficiently. Want to make certain your project goes smoothly? Invite us to partner with you at **Preconstruction**.

# Welcome Rodney Bohm, Architectural Precast Manager!

From Left to Right:  
Hagen Harker  
President, Kevin  
Wald Operations  
Manager, Rodney  
Bohm Architectural  
Precast Manager

**R**odney joins the Mid-States team with over 30 years of mix design and architectural precast application experience. Rodney has been hard at work ensuring that our architectural

products live up to Mid-states reputation for providing high quality products and services. Mid-States already has a robust quality system in place, which makes the addition of architectural precast a natural one.

With Rodney's experience and attention to detail, our customers can rely on Mid-States Concrete Industries for their architectural precast needs.

## Above and Beyond for Safety

**S**ome customers request that we make sure we have at least one person on site with their OSHA 10-hour card. As usual Mid-States commits to exceeding expectations, especially when it comes to safety. During the second week of March all of Mid-States Field Service Foremen underwent **OSHA 30-hour training**. Well done and thanks for working safely to all of our Field Service personnel.

From Left to Right: Brian Blum, Shannon Scharmer (Safety Director), Mike Wright, Mark Buchko, Matt Kennedy, Jaron Combs, Shane Draeving, Toby Bennett (Project Manager), Front: Jim Herbst (Field Service Manager)
