THE MID-STATES CONCRETE MESSENGER

Volume 2

Issue 4

December 2008

Mid-States Advances the Cause of Science

When the Argonne National Laboratory decided to build a structure that was both aesthetically pleasing and functional there was really only one choice for construction materials: Mid-States high quality precast products. The new Theory and Computing Sciences Building will provide a world-class research center that will host servers and large scale systems needed to support the growing number of R&D programs across the laboratory's entire campus. While the scientists will use the new building to work on understanding such things as the performance of superconducting niobium cavities, we will continue to enhance our ability to simplify the building process for our customers. Give us a call early to take full advantage of our project management and engineering expertise!

Precision Work? Call in Mid-States Early!

The bell tower restoration of the historic Champaign County Courthouse demanded perfection from the precaster involved, so this project was ideal for Mid-States Concrete. Tight MNL 117 tolerances were required to ensure that the original spire, clock faces, and bell will fit perfectly into the new precast tower. The original bricks were removed from the old tower and their location recorded so that they can be placed in their proper location on the historic landmark. If you have a job that poses a challenge give us a call!

Turkey's for Turkey Day

The Mid-States Charitable Contributions Committee was pleased to provide the local Salvation Army with eight turkeys for their annual Thanksgiving Dinner. The Committee was able to allocate the funds from money raised throughout the year with cookouts, silent auctions, and various other fund raising efforts. The Charitable Contribution Committee is also very excited about the results from the Angel Tree program this year!

The December Safety Nickel Awareness Program awards went to Mark Buchko from the Field Erection Crew and Mike Flemming from the Yard Crew. Congratulations to both on winning.

Thanks to everyone that participated and went above and beyond for Safety!
